It will float when its ready.

Your chicken will be pan seared and seasoned.

Put the whole foil pan in the oven at 350 degrees. It will take about 20 minutes to finish out. To ensure that your chicken is done, you can use a thermometer to make sure it is at an internal temperature of 165 degrees. If you do not have a thermometer you can cut the chicken by the bone to make sure there is no pink.
