

How to Play Keno...*the basics...*

Regular Keno

Pick your favorite numbers.

Pick 1 to 15 of your lucky numbers from 1 to 80. Get your bet slip in the keno caddy on your table or at the keno station and mark those numbers with an "X."

Place your bet at the keno counter.

Write your wager amount, such as \$1 or \$2, in the "total price" box in the upper right hand corner of the bet slip. Mark your ticket "Regular." Then get ready to place your wager by taking your money and your bet slip to the keno station. Give the money and your bet slip to the keno writer. The keno writer will give you your computer-generated keno ticket.

Watch the game as the numbers are picked.

Now take your keno ticket back to your table, sit down and relax. Look for the TVs and keno boards displaying the keno game, and watch the 20 numbers get selected...the 20 numbers are selected approximately every 5 minutes.

Check your ticket

After the 20 keno numbers are drawn, look to see how many of your numbers were selected ("HIT").

For example, if you chose 2 numbers, and you "HIT 1 of your 2 numbers, you win 50 cents, if you "HIT" both of your 2 numbers, you win \$10.

If you chose 3 numbers, and you "HIT" 2 of your 3 numbers, you win \$1. If you "HIT" all 3 of your numbers, you win \$46.

To collect your winnings, take your computer-generated keno ticket back to the keno station and the keno writer will pay you your winnings.

That's all there is to it! So grab a bet slip, mark your lucky numbers and give it a try!

Other Popular Keno Games

There are many other games available in addition to regular keno. Shake it up by playing some other keno varieties, such as:

Top/Bottom

Mark your ticket with the half you wish to bet, for example, "TOP," "BOTTOM," "RIGHT" or "LEFT." If you hit 12 or more you win!

Sweet Sixteen

Mark your ticket Sweet 16 and pick 16 numbers. You may bet \$2 or more. Depending on how many of your 16 numbers come in, 0 to 16, you can win from \$16.00 to \$25,000!

Big Bang

Mark your ticket "BB," and pick 3 to 5 numbers. You may bet \$1 or \$3 and get an even bigger bang for your bet!

Catch-Alls

Mark your ticket "CA" and pick 2 to 6 numbers. Bet \$1.25 or more and win much bigger if you catch all numbers picked, but you must "HIT" all of your numbers to win on this bet.

No-Lose 17 Spot Special

Mark your ticket "No-Lose 17 Spot," and pick 17 numbers. It costs \$3 to bet this game, but no matter what numbers are drawn you'll get money back.

Quarter-Mania

Mark your ticket "Quarters," and pick 1 to 15 numbers. This game has a \$1 minimum ticket, with a 25-cent minimum wager per way or per game.

Penny Arcade Keno

These special tickets are pre-programmed so you don't need to mark any numbers on your keno ticket, but rather mark you ticket with one of the special ticket numbers listed below. The price and number selections are shown on special orange and yellow game cards in the keno caddy on your table. Simply write how many games you wish to play and the total amount of your wager (#games X cost/game).

Mark your keno ticket:

Penny's #27 for Verticals

Penny's #28 for Boxes

Penny's #29 for 3's & 6's

Penny's #30 for 10-Spot

See the Keno Pay Book for more information on these fun promotional game tickets.

Way Tickets

A "way" on a keno ticket is simply one chance to win. You can remember that one "way" is one chance to win.

The reason that the "way" ticket exists is so that you can have many chances ("ways") to win all printed on a single keno ticket, rather than having multiple tickets printed to accomplish the same number of chances ("ways") to win.

By playing a "way" ticket, you can combine your favorite keno tickets into one "way" keno ticket that has two chances ("ways") to win. On your ticket, just circle the numbers that go together for each "way."

There are many other special, seasonal, monthly and daily games available for you to play, so be sure to look at the KENO PAY BOOK in the keno caddy on your table or check out our PAY BOOK on lime at <www.hastingskeno.com>!
