Our “Kidtastic” Philosophy

Our philosophy is focused on creating an individualized educational plan for each and every child we have enrolled within our program. It is our belief that all children thrive when taught to their strengths. As educators it is our responsibility to discover each child’s individualized learning style and promote a love for learning within each child.

“Kidtastic” Mission Statement

It is the “Kidtastic” mission to provide children with a safe, nurturing, and educational place to go when their parents are absent. Here at Kidtastic Kids we feel that it is very important to give each child individualized, and loving care. It is also our mission to help parents and children in any way that we can, by answering questions, offering information, and serving their individual needs. It is our belief that children learn best through experience, while in a safe, loving and supportive environment.

“Where Imagination Brings Learning to Life”
